

InteropEHRate Final Conference

Provisional programme

Liège, 28 September 2022

BACKGROUND

InteropEHRate Final Conference will be held on 28 September 2022 at the University of Liège, Belgium. It will bring together the knowledge and experience gained during the implementation of the project to improve health data sharing for care and research.

The event will be hybrid allowing virtual and on-site participation of those interested in discussing how to advance towards a citizen-centric health data sharing approach. All attendees, both present on site or connected virtually will have thus the opportunity to interact with the speakers and the audience.

AIM

The final conference main aim is to present InteropEHRate's key results to an audience of multiple stakeholders that range from policy makers to different types of potential adopters including European, national, regional and local health authorities, healthcare providers, health research centres and health technology companies.

OBJECTIVES

1. Present the key project results and the lessons learned through the implementation pilots.
2. Advocate for a "Citizen-Centric Data Sharing Approach" complementing the traditional healthcare-centric one.
3. Involve patients and clinicians who have contributed to the pilots.

REGISTRATION

PROVISIONAL PROGRAMME

Wednesday, 28 September 2022		
Time	Agenda	Speakers
