Data Protection Officer

Expert team dedicated to health data.

isalid technology

First smart contract based solution for e-consent & opt-out of patients

Patient's thoughts

"My health data is mine"

"What data warehouses?
Are they selling my data?"

Fear

"Why am I in this information system
by the way?"

"Only my HCP can access my
health data"

Professional conviction

"It is for their own good"

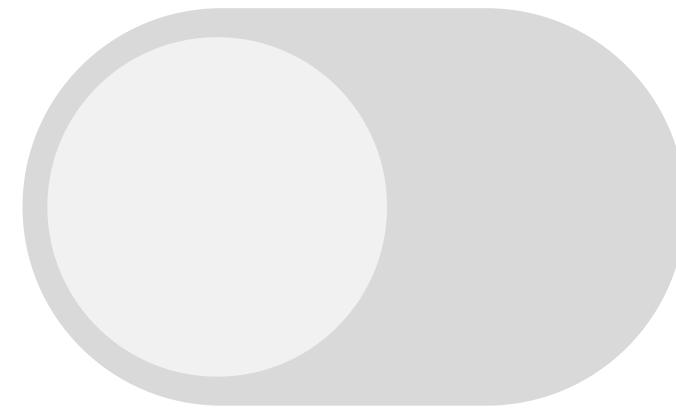

"It will not change their treatments"

Distance

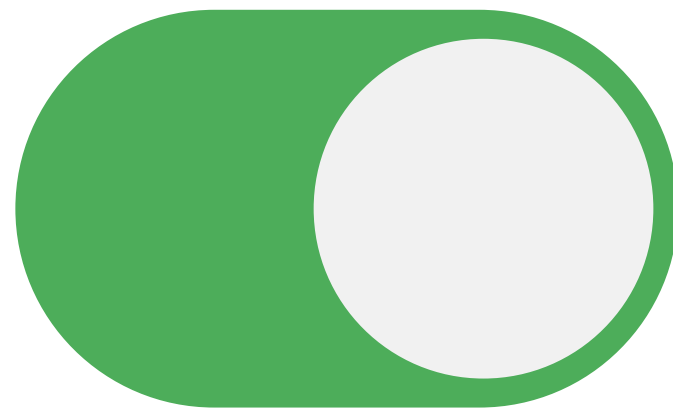

"We do not need to bother the patient"

"The patient will not understand"

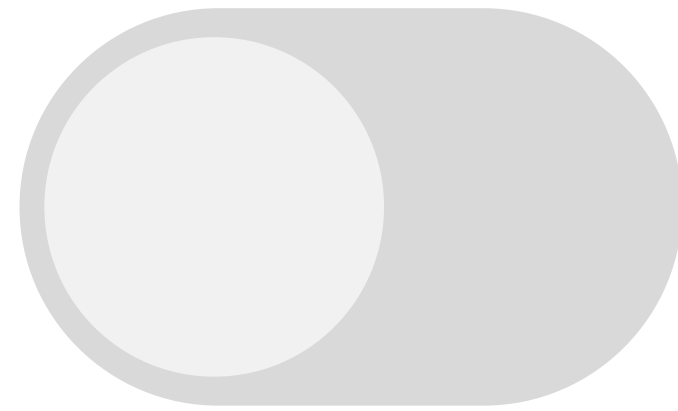

Fear

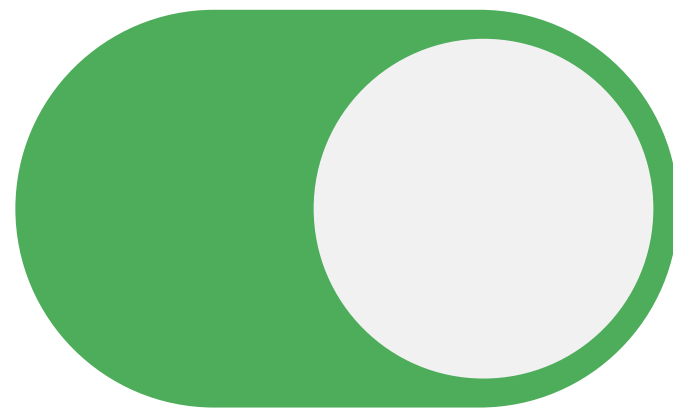

Education

Distance

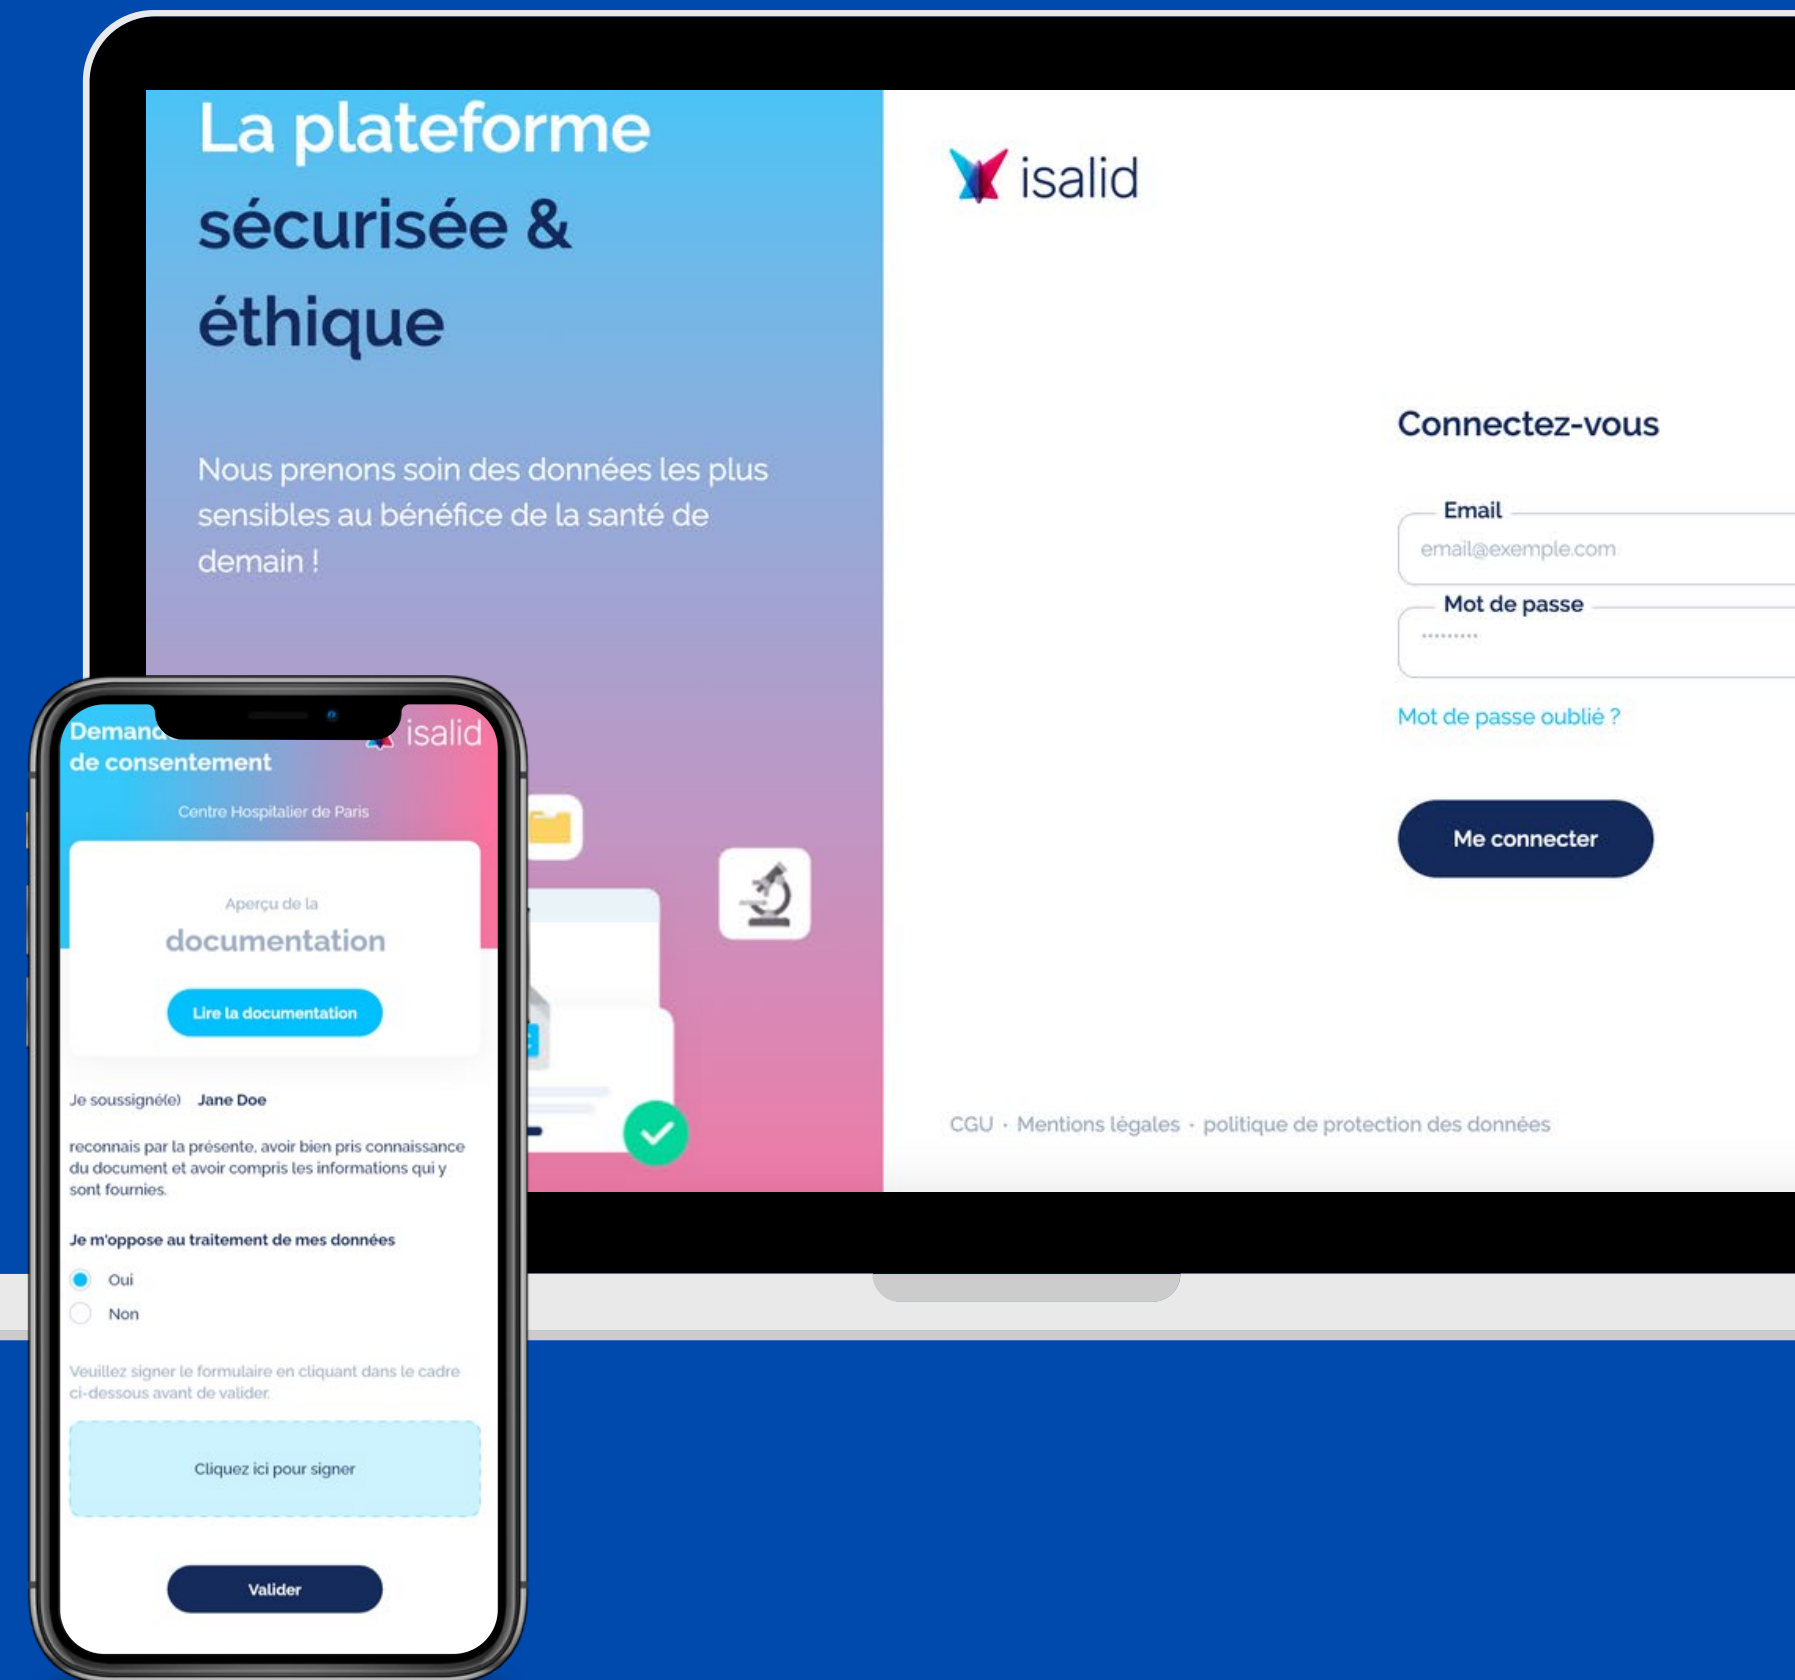

Communication

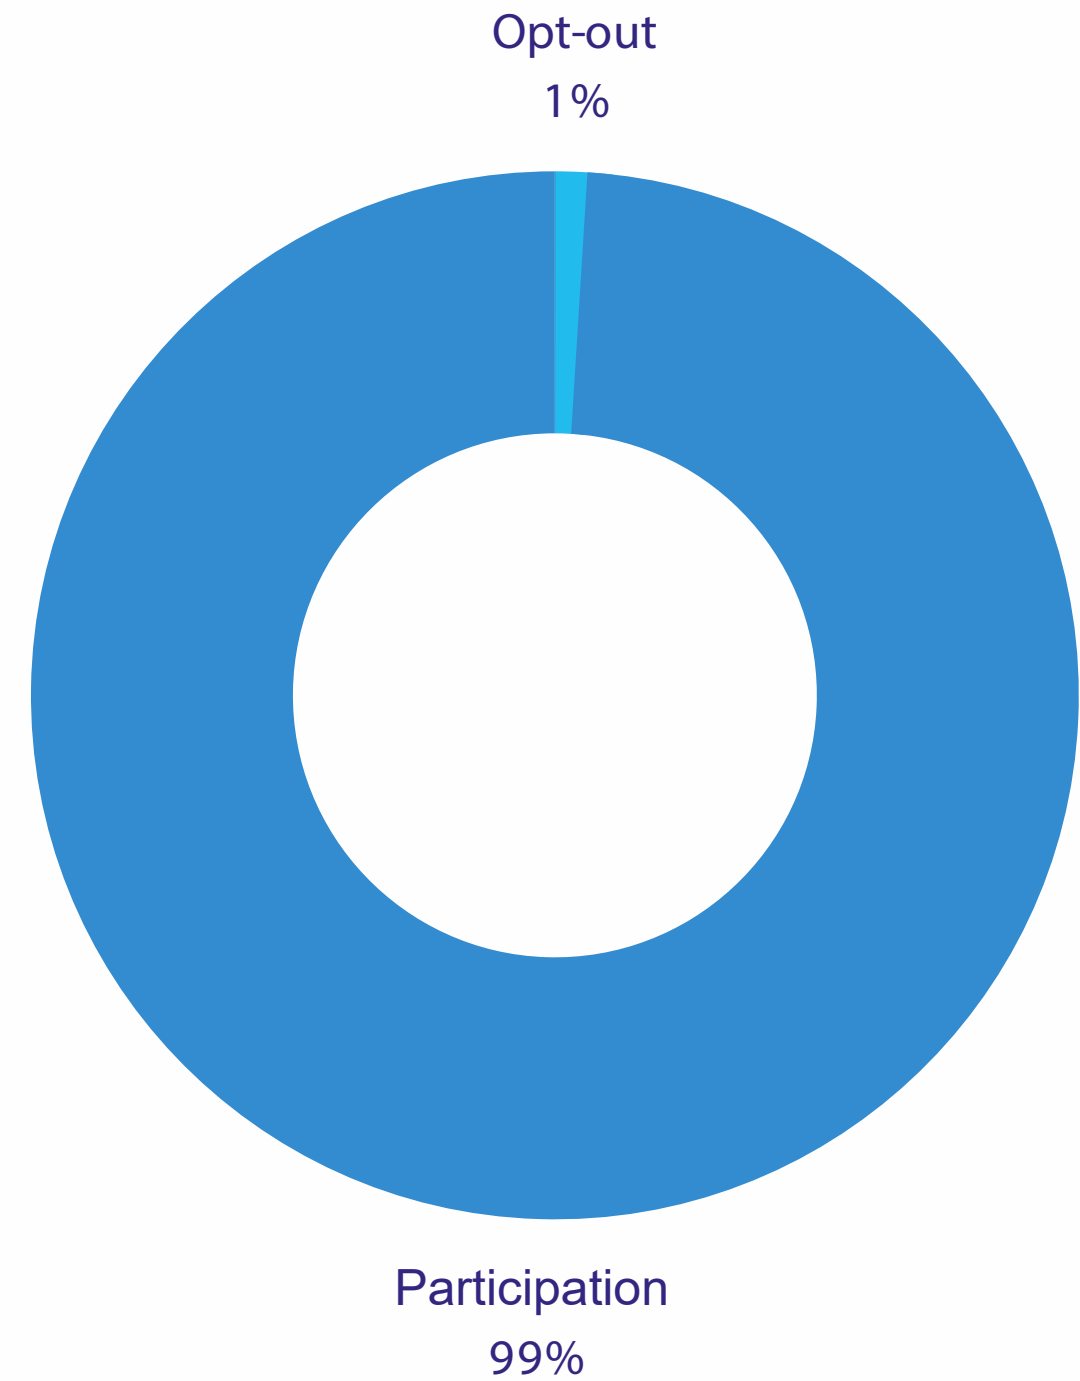

ISALID : E-CONSENT & OPT-OUT BLOCKCHAIN

Patients ask for information.

Patients want to be involved in data research.

Data from isalid use within 27 hospitals in France, 2022.

Data is individually valuable
and collectively powerful.

Let's build data ethics together.

Thank you !
