COMPDIG-Salut

Catalan Healthcare Model Overview

- **Decentralized, multi-provider** model integrated in a single public network.
- Enhances the **autonomous management** of each provider, **free to select** their information systems.
- **Interoperability** among ICT systems must be guaranteed.

- **7.5M** people
- **83 years** life expectancy at birth
- **18%** of the population over 65 (4.3% over 80)

7

Involving different roles

Profile	Description	Role examples
 Ass pati	 1. Access, management and Data Analysis	 3. Digital Consciousness
 Ass dire	 2. Communication and Collaboration	 4. Professional development
 Innovation, research and teaching	Professionals who spend more than 70% of their workday offering services in the ambits of innovation, research or teaching	<ul style="list-style-type: none"> • Dental prosthetic • Investigators • Innovation technicians
 Management	Professionals who spend more than 70% of their workday managing centres, entities, departments, services or work teams	<ul style="list-style-type: none"> • Directors • Middle managers

8

Conclusions

Aligning planning and professional organization policies with the existing healthcare models

- 1 necessity to improve the digital competences of healthcare professionals
- 2 Redefining a current instrument for measuring the Digital Skills
- 3 ACTIC → ACTIC-Salut (contextualized in Health field and different roles)
- 4 Defining a strategy and action plan for training HP
- 5 Training itineraries and training content
