# TALISMAN

Customized assistance technologies  
for improving the quality of life

**A SUCCESSFUL PUBLIC-PRIVATE INITIATIVE TO FOSTER THE DIGITAL TRANSFORMATION OF CLINICAL HEALTHCARE PROCESSES IN SUPPORT OF CONTINUITY OF CARE.**

**WWW.PROGETTOTALISMAN.IT**

The TALISMAN project proposes a new concept of frailty, based on a holistic view of the state of the individual, including social, psychological and functional factors. Taking care of the frail and chronic patients in TALISMAN means making available an **ecosystem of integrated digital services**, that can support a continuity of care model that includes: population stratification, enrollment, multidimensional need assessment, personalized care plan, and follow-up management **using telemedicine** services. Efficacy of clinical governance, health care sustainability, and prospects for a new marketplace based on the **open innovation** paradigm are the indicators of the success of the TALISMAN project.
